

LRB 40 SKIMMER

Inventory

	Great Lakes	Québec	Atlantic	Total
LRB 40	-	2	-	2

Application

Suitable for the recovery of light to high viscosity oil. Suitable for shoreline and on water usage. Suitable for use where debris is present or in broken ice conditions. Can be deployed from an excavator on a shoreline or by crane on a vessel or recovery barge.

Description

An oleophilic brush wheel capable of operating in both directions depending on the type of oil. The oil is picked off the water by the rotating brushes and scraped off into a sump. An external pump moves the recovered oil to an external storage unit.

Operating Data

Nominal recovery rate: 60 tons/hr
De-rated recovery rate: 288 tons/day

Technical Data

Length: 0.88 m
Width: 0.68 m
Height: 0.80 m
Weight: 75 kg
