

MOBILE UNIT / BASE STATION

Inventory

	Great Lakes	Québec	Atlantic	Total
Mobile Unit / Base Station	9	23	13	45

Application

This type of unit is used to enhance the coverage area given its transmitting power is stronger than a typical handheld (portable) unit. It is utilized as a mobile unit (in truck, boats or field operation centre) or as a base station in the management centre.

Description

The MOTOTRBO XPR 4580 is a digital mobile radio that operates in the UHF-800MHz frequency range. The radios have a number of operating channels to provide for greater flexibility when establishing a communication network with a lot of different teams. The radios can be used in a simplex mode (radio to radio) or through a repeater system. Dedicated transportation cases, meeting air transportation specifications, are available for the transportation of radios.
